Strategy for Factoring Trinomials: Step 1: Multiply the first and third coefficients to make the "magic number". Make sure your trinomial is in descending order. Step 2: Write out the factor table for the magic number. Step 3: Play the "X" Game: Circle the pair of factors that adds up to equal the second coefficient.

**Factoring Trinomials Guided Notes**

Step 1: Make sure that the trinomial is written in the correct order: the trinomial must be written in descending order from highest power to lowest power. Step 2 : Decide if the three terms have anything in common, called the greatest common factor or GCF. If so, factor out the GCF. Do not forget to include the GCF as part of your final answer.
