FOR IMMEDIATE RELEASE

You're completely wrong. Time released pain meds are the best for chronic pain, because they keep a steady level in your body. Immediate release pills can be used for any break thru pain. You won't "feel" the effect with the time release, because of this. It works better for pain relief.

Time released vs. Immediate released? - Drugs.com

Modified-release dosage is a mechanism that (in contrast to immediate-release dosage) delivers a drug with a delay after its administration (delayed-release dosage) or for a prolonged period of time (extended-release [ER, XR, XL] dosage) or to a specific target in the body (targeted-release dosage).
