Worksheet

it's isosceles, the two base angles are going to be congruent. This is one leg. This is the other leg right over there. So the two base angles are going to be congruent. So we know that this angle right over here is also 31 degrees.

Knowledge: Justify Mathematical

Argument (1)(G) A builder using the truss shown at the right claims that $\triangle ACB$ will have the same measure as $\triangle ADB$. and represent identical beams, and bisects $\angle CAD$.

Access PDF Isosceles And

Equilateral Do Now Lesson Presentation Exit Ticket

For example, if your isosceles triangle has sides of 5 centimeters, 5 cm, and 6 cm, use 6 cm as the base. If your triangle has three equal sides (equilateral), you can pick any one to be the base. An equilateral triangle is a special type of isosceles, but you can find its area the same way.
