The Biosphere: Protecting Our Global Environment

A trillion is a thousand billion, so 29 trillion dollars could fund 290 years of conservation efforts that protect half the Earth and help stabilize the climate.

To save Earth 30 percent of the planet must be protected ...

Biosphere - Biosphere - The importance of the biosphere: The continued functioning of the biosphere is dependent not only on the maintenance of the intimate interactions among the myriad species within local communities but also on the looser yet crucial interactions of all species and communities around the globe.

Biosphere - The importance of the biosphere | Britannica

The biosphere is made up of the parts of Earth where life exists. The biosphere extends from the deepest root systems of trees, to the dark environment of ocean trenches, to lush rain forests and high mountaintops. Scientists describe the Earth in terms of spheres. The solid surface layer of the Earth is the lithosphere.

biosphere | National Geographic Society

Biosphere Reserves. With 669 sites that are home to some 170 million people in 120 countries, the Biosphere Reserves Network is a world in itself. In these "living laboratories," communities develop stimulating projects to promote the harmonious coexistence of people and nature. Their initiatives have a global impact.

Protecting our heritage and the biosphere

Volunteer for cleanups in your community. You can get involved in protecting your watershed, too. Educate. When you further your own education, you can help others understand the importance and value of our natural resources. Conserve water. The less water you use, the less runoff and wastewater that eventually end up in the ocean. Choose sustainable.

Gaia's ecosystem organs - old-growth forests, natural waterways, bountiful oceans, vibrant soils - will be restored and maintained at all costs as global ecological reserves to power the biosphere and maintain a living and livable Earth. Such a global ecology ethic goes well beyond the obvious and demands a complete reorganization of the dominant paradigm.

Reuse. Simply reusing old items can help protect the environment. Glass containers can be used for storing food or other items, cereal bags can be used in place of Ziploc bags, and old or unused items can be sold in a yard sale; it's about finding alternative uses for items so that waste can be reduced.
